Subject: Microsoft anti-trust

Please don't let Microsoft get away with it. Microsoft would have been just fine if not for their cut throat business practices. Releasing a OS that compeats fairly on the market would mean that microsft would have about 50-60% market share. But when a hardware manufacturer has to sign an agreement to only sell computers with only the one type of operating system it hurts all of us. Competition is what makes our capitalist economy go round and when the OS manufacturer stops that from happening we become little more than a communist commune. Their control of the market has been unmeasurable and this control has damaged the way we live, the way we learn, and the way we work. Microsofts Monopoly has cost businesses in the US alone Billions in dollars that could have been paid back to stock holders or be used to pay off loans and help the economy instead of hurting it. Don't let Microsoft screw us all again make them work with binders on for awhile and see if they can deal with some of their own medicine.
